WALL SYSTEM
Reverse R-Panel
Regal White

ROOF SYSTEM
Standing Seam 360
Midnight Black

BUILDING END-USE
Boarding, Riding & Training
Horse Barn

The Woodland Acres Equestrian Center, located in Wadsworth, OH, is a purpose-built facility designed for boarding, riding, and training horses. Constructed with a gable symmetrical framing system, the barn features a Reverse R-Panel wall system in Regal White and a Standing Seam 360 roof system in Midnight Black. With a 27' eave height, the structure accommodates windows positioned above the adjacent existing building, as well as vertical overhead doors and enhanced ventilation.

The roof is adorned with field-fabricated cupolas, adding both function and aesthetic appeal. As an over 27,000 sf addition, the barn expands the overall footprint to a 40,630 sf facility when combined with the existing structure. Built adjacent to a shorter existing building, the project presented unique challenges including the roof tie-in of boarding facilities, the integration of expansion joints, and the customization of box stalls and tack rooms to meet specific operational needs. The result is an elegant equestrian facility tailored for high-performance use.
