

Bourgon Construction

Office & Warehouse

LOCATION

Cornwall, Ontario

SIZE

7,000 sf

WALL SYSTEM

Insulated Metal Panel

ROOF SYSTEM

Insulated Metal Panel

Bourgon Construction's new office and warehouse facility in Cornwall, Ontario's business park is a steel building designed to showcase materials that can meet and exceed the latest energy code requirements and stimulates interest in more attractive commercial and industrial buildings.

The office portion of the building features 6" insulated metal roof panels which have been left exposed in the main reception area to show building owners and designers how the system works and how clean a finish the panels provide. The warehouse block is clad with 5" insulated panels and 3" wall panels, with the entire structure left exposed. Other building features include high clerestory windows in the warehouse and office, extensive glazing, and a mix of premium cladding materials.

Innovation. Technology. Solutions.
