

Carter Middle School Gymnasium

LOCATION

Knoxville, Tennessee

SIZE

12,552 sf

WALL SYSTEM

ST40 Striated Insulated Metal Panels

ROOF SYSTEM

Standing Seam 360

A multi-use gymnasium for a middle school, this clear span building is surrounded by a combination of ABC's Striated ST40 insulated metal panels and 15' high masonry. Steel within the gym was left exposed and painted white. It also features a Standing Seam 360 roof system. Additional bracing was added to accommodate basketball goals weighing nearly 2,000 lbs each. Adjacent to the gym are new locker rooms, storage space, and classrooms.
