

Centralia High School

Classrooms & gym

LOCATION

Centralia, Illinois

SIZE

19,685 sf

WALL SYSTEM

Long Span III

ROOF SYSTEM

Loc Seam 360

This building is made up of 2 parts: a gym and classrooms. Both were single slope structures with metal studs clad with siding and EIFS. This is an annex to the main school that was built recently. The design of this school gives an economical yet compatible aesthetic look to the main school whose exterior has red brick and stone.

Innovation. Technology. Solutions.
