

# Coyne Powersports

## LOCATION

Banning, California

## SIZE

10,400 sf

## WALL SYSTEM

Insulated panels with stucco

## ROOF SYSTEM

Standing Seam 360

When Coyne Powersports decided to expand and build its second facility, they chose American Buildings Company. Their newest facility was designed as a single slope structure with tapered columns, and features stucco finished walls. Added curb appeal was designed into the parapet which varies from 25' to 28' in height. This project has a sales showroom, parts department, and service/repair shop.
