

Dearing Compressor

Compressor manufacturing

LOCATION

Boardman, Ohio

SIZE

26,300 sf expansion

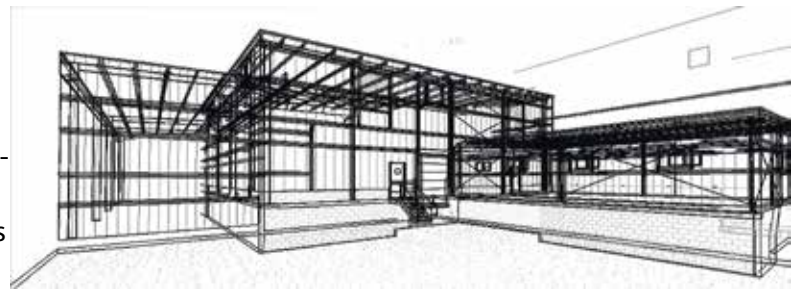

WALL SYSTEM

LongSpan III

ROOF SYSTEM

LongSpan III

Due to a growing business, Dearing Compressor needed to expand its current facility. BIM 3D technology was used to design this five-building expansion, which is made of two single-sloped buildings and three lean-tos. It includes five top-running cranes and 10 column mounted jib cranes.

Dearing Compressor manufactures compressor and pump systems for various industries, including the gas and oil business.

Innovation. Technology. Solutions.
