

Faeza

Alloy manufacturer

LOCATION

Shelbyville, Indiana

SIZE

54,012 sf

WALL SYSTEM

LongSpan III & ST40 Striated
insulated metal panel

ROOF SYSTEM

Standing Seam & LocSeam

This project consists of six connected ABC steel buildings. All six are single sloped, and four are clear span design. There is a hip roof at the office with 4:12 slope that features the LocSeam vertical rib standing seam. The office buildings feature horizontal ST40 Striated insulated metal panels, masonry wainscot, ribbon windows, and skewed corner.

Innovation. Technology. Solutions.
