

Ford Ice Center

LOCATION

Nashville, TN

SIZE

80,000 sf

WALL SYSTEM

HE40 Heavy Embossed
Insulated Panels

ROOF SYSTEM

SR2 Insulated Standing Seam

BUILDING END-USE

Recreational Facility

Home of the Nashville Predators and designed using BIM 3D technology, the beautiful Ford Ice Center features two hockey rinks, locker rooms, a yoga studio, concessions, and a 2,000 sf pro shop. A partial mezzanine houses a lounge area that overlooks both rinks.

The exterior is a combination of HE40 (heavy embossed insulated metal panels) and acrylic aluminum panels. Though dramatic in its unique design, this structure also achieved a Silver LEED® Certification due to its energy-efficient and sustainable qualities.
