

Knauf Fiberglass

Warehouse

LOCATION

Shelbyville, Indiana

SIZE

307,250 sf

WALL SYSTEM

Architectural III

ROOF SYSTEM

Standing Seam

This is a single slope building with two expansion joints, and is 575' wide. The interior pipe columns were filled with grout to 10' for forklift protection. The perimeter of this building includes concrete wainscot and plywood liner panel to 11'. An existing 240,000 sf building was demolished to make room for this project. The single slope design allowed storm water to be routed in a way that saved \$150,000 in piping costs.

Innovation. Technology. Solutions.
