Galvalume

BUILDING END-USE

Indoor Soccer Field

Seated within Gardner Village's historic farm architecture is a custom built state-of-the-art indoor soccer facility. This 42,000 structure was specially designed to fit within the landscape of this beautiful village.

One of the largest of its kind in Utah, this metal building is a gable design with tapered columns to conserve interior space. It features cupolas along the ridge, barn-like door designs, and a unique canopy along the entrance wall. The interior is fully equipped with turf fields that can accommodate multiple games concurrently.
