Standing Seam 360

BUILDING END-USE

Auto Dealership

This beautiful dealership sits on top of hilly terrain off Route 206 and is visible over a mile away. The showroom exterior features silver aluminum composite material with a blue accent band. There is an integrated entry element at the showroom portion of the main building to hide the portal frame, with an exposed structure at the service portion of the building to highlight its industrial look. Translucent panels were put along the exterior wall in the service department to let natural light into the space, reducing daytime lighting needs.
