Long Span III

WALL SYSTEM

Architectural III & masonry

Musicworks is a premier music education center & instrument sales company. Their new facility is a single slope building that uses multiple wall panel colors and a 1'-0" parapet wall.

It houses multiple practice rooms for students taking lessons, with all doors having sound seals. A large sales floor offers anything from pianos to electric guitars. This project was also designed to accommodate their large online business, which sells & distributes instruments throughout the United States.

Innovation. Technology. Solutions.
