

Northwood Academy

Upper school

LOCATION

Summerville, South Carolina

SIZE

57,000 sf

WALL SYSTEM

Brick & stucco

ROOF SYSTEM

LocSeam 360

This gorgeous upper school is part of a 40-acre campus. It is oriented along several axes to maximize space on the site and coordinate with the existing Northwood Church and lower school building.

Each of the six buildings in this complex are clear span structures with 6" bypass girt conditions on all walls. A gable skewed entry area features a gorgeous entry dormer leading to the massive cafeteria. A total of 15 support beams were added to accommodate the basketball goals in the gymnasium. The media/storage building features an expandable endwall for future growth.

Innovation. Technology. Solutions.
