BUILDING END-USE

Storage Barn

Custom old fashioned style 80'x40' metal building, with a mezzanine, and a gambrel roof design. From the front sidewall eave height, the roof slopes up 18:12 for 8'-0" to an eave height of 28'. From that point the roof slopes 4:12 for 12' to the ridge. A transverse beam from sidewall to sidewall at 14' height at all column lines was used for additional support.
