

Zip City

Indoor zip line & trampoline facility

LOCATION

Streetsboro, Ohio

SIZE

17,600 sf

WALL SYSTEM

Insulated Metal Panels

ROOF SYSTEM

Standing Seam II

An indoor trampoline and zip line park, Zip City USA is a 17,600 sf steel building with two mezzanines and a canopied corner entrance. Designing this complex project was achieved using BIM 3D technology, which had specific requirements and restrictions to accommodate an indoor zip line that fit over a trampoline area. Two beams supplied additional support at the ridge for fans weighing over 1,000 lb each.

Innovation. Technology. Solutions.
