

Gaston Fire Department

Emergency Reponse

LOCATION

Gaston, North Carolina

SIZE

12,900 Square Feet

WALL SYSTEM

Architectural III

ROOF SYSTEM

Standing Seam II

This project is a gable style building and it includes clear span across the truck bays. The ability to “piggy back” the taller truck bays on top of the office area makes a nice tie in of the two buildings without endwall columns blocking numerous walk doors between the two sections.

Innovation. Technology. Solutions.
