BUILDINGS**

A **NUCOR** COMPANY

#### LOCATION

Georgetown, Delaware

#### SIZE

46,000 sf

#### WALL SYSTEM

Long Span III

#### ROOF SYSTEM

Loc Seam

This project was an addition to an existing church. It consisted of three gable style buildings along with a single slope building. These additions created an education center, full gymnasium, full kitchen, and a multipurpose conference room. It is a combination a pre-engineered building and conventional steel for porticos and dormers.

**Innovation. Technology. Solutions.**
