N/A

ROOF SYSTEM

Loc Seam 360

Taupe Sand

This project consisted of the design and construction of a pre-engineered metal frame, Low-E storefront glazing, church facility built on a drilled piers and concrete grade beam foundation. The design was for a barn style building, featuring a welcoming indoor/outdoor lobby and auditorium on the main level, children's and youth environments in the basement and office/midweek space in the second floor loft.

Innovation. Technology. Solutions.
