## Builder Dashboard gets a Makeover

The American Buildings Builder Dashboard now has a fresh, new look. This newly designed, user-friendly platform is fully responsive to mobile devices, and packed with resources important to you. We encourage you to explore the site's many features and take advantage of our individualized marketing support services.

With this launch, we have included the interactive Energy Code Maps for the U.S. and Canada, with state-specific energy code information that can be downloaded to your device. The interactive Energy Code Maps are also available on the ABC Toolbox app.
