

# Crazy Critters Cabin private residence

## LOCATION

Camby, IN

## SIZE

9,528 sf

## ROOF SYSTEM

Standing Seam 360

This private residence, known as Crazy Critters Cabin, is a 9,528 square-foot spectacular home that is comprised of two American Buildings structures — a barn area and living space. The barn building was designed around a 65' x 120' clear span symmetrical gable structure that includes an indoor basketball and tennis court, and a rock-climbing wall. Perpendicular to the barn structure is a 48' x 36' two-story living space with a 1,728 square-foot Ecospan® partial mezzanine. In addition to the framing, ABC's Standing Seam 360 roof system was also utilized. The design highlights exposed structural steel with wood beams throughout the interior and stone and wood siding on the exterior, all blending together, resulting in a truly unique residence.
