BUILDING END-USE

Agriculture

AFG Feed LLC is an agribusiness focused on providing sustainable feed solutions for cattle producers in Georgia and the tri-state area region. AFC manufactures pelletized cattle feed utilizing commodity ingredients from other agribusiness companies.

To support growing operational needs, a seven-building complex that includes a process building, drive-thru building, process warehouse, peanut building, an office, and a boiler room was designed. The process building has a roof opening to accommodate a 30'x30' bin tower.
