41,030 sf

## WALL SYSTEM

Long Span III

## ROOF SYSTEM

Long Span III

AFG Feed LLC is an agribusiness focused on providing sustainable feed solutions for cattle producers in Georgia and the tri-state area region. AFC manufactures pelletized cattle feed utilizing commodity ingredients from other agribusiness companies.

To support growing operational needs, American Buildings worked with our Authorized Builder to design and manufacture a seven-building complex that includes a process building, drive-thru building, process warehouse, peanut building, an office, and a boiler room. The process building has a roof opening to accommodate a 30'x30' bin tower.
