

Beck's Hybrids Seed Processing

LOCATION

El Paso, IL

SIZE

32,100 sf

WALL SYSTEM

Insulated Metal Panels

ROOF SYSTEM

Standing Seam

BUILDING END-USE

Seed Processing

A custom designed seed processing facility located in America's heartland that features an 80' eaves and is surrounded by insulated metal wall and roof systems.

From concept to completion in under two years, it was built for Beck's Hybrids, the largest family-owned retail seed company, serving farmers in the midwestern United States. It contains eight levels, approximately 32,100 sf of floor space, and over 300 linear feet of stairways and ladders.
