R-Panel
Galvalume

BUILDING END-USE

Seed Processing

Peterson Farms Seed is the Red River Valley region's largest independent seed company, providing corn and soybean seed to Minnesota, North Dakota & South Dakota farmers. Proud of their history, the company has evolved into a regional powerhouse.

Peterson Farms Seed has multiple American Buildings warehouse buildings. This addition project was extremely challenging because one of the buildings had to be constructed around the existing seed machines. Building one is a 73'-8" x 29'-3 1/2" x 52' / 58'-1 5/8" single slope with tapered columns. Building two is a 20'-10" x 22' x 60' / 61'-8 13/16" reverse lean-to with tapered columns. Building three is a 180' x 200' x 27' single slope warehouse addition.
