BUILDING END-USE

Equine Hospital

his state-of-the-art facility allows the staff of the equine hospital to provide a greater standard of care and services with 24/7 availability accommodating horses throughout Southern California. The project is a 114' x 110'-4" gable building with supermarket columns. Six dormers, one 2-story tower with hip and valley tie in to the main building. The main building features a cupola that has an eave height of 30'-2 1/2" with an 8/12 slope.
