

# SKS Bottle & Packaging

Office/Warehouse

## LOCATION

Saratoga Springs, NY

## SIZE

120,000+ sf

## WALL SYSTEM

Insulated Metal Panels

## ROOF SYSTEM

B-deck 22ga

This project is a state-of-the-art bottle and packaging facility. We opted for an internal gutter sawtooth roof design utilizing American Buildings Company's long bay bar joist and 22ga B deck. The mezzanine is an Ecospan® composite floor system with 1.0C 24ga deck. The wall system was a combination of ABC's cold form girts with 3" insulated metal panels. Over portions of the office insulated wall panel, we utilized a white ProCore exterior citadel system for an added aesthetic element. Shovel in the in ground to completion was 10 months.
