Galvalume

BUILDING END-USE

Warehouse

Authorized builders worked with the city of Fort Wayne to design this Rigid Frame Multi-Span warehouse for Amazon. This state-of-the-art building is 150,000 sf, and utilizes DM40 Insulated Metal Wall Panels in royal white, with accent panels in slate gray. The exterior is a combination of concrete masonry with DM40 Insulated Metal Wall Panels.

A sprinkler system was added to the internal part of the building, to ensure fire safety and control throughout the warehouse.
