## LOCATION

New Holland, PA

## SIZE

69,000 sf

## WALL SYSTEM

Architectural V Rib  
Fox Gray

## ROOF SYSTEM

Standing Seam 360  
Galvalume

## BUILDING END-USE

Manufacturing

This building is the home of Country Lane Woodworking, manufacturer of custom gazebos, pergolas and trellises. The manufacturing facility will serve as the company's corporate headquarters and house state of the art equipment for products that are shipped all over the world.

American supplied the expansion for the 69,000 sf warehouse facility attached to the front office. Built using a gable framing structure and a ClearBay fully bolted joist system, the warehouse features multiple framed openings for vertical lift and walk doors as well as full-height partition walls. In addition to American Building's wall system, 4' masonry wainscot lines the exterior. The existing 15,000 sf front office building is finished with real stone veneer, numerous windows for plenty of natural lighting, a second floor pergola, and dark bronze accents that add to its modern appeal.
