LOCATION

Munster, IN

SIZE

44,000 sf

WALL SYSTEM

Insulated Metal Panel
Slate Gray

ROOF SYSTEM

Standing Seam 360
Galvalume

BUILDING END-USE

Brewery & Restaurant

This project is a new addition to Three Floyds Brewery in Munster. The new brewery bottling line is a 44,000 sf addition to an existing structure. This three-story distillery is custom designed using five American Building pre-engineered metal structures, creating one large facility with various roof pitches and an insulated skylight on the bottling line building. The walls feature a combination of insulated metal panels and masonry, with a below-eave canopy along the front entrance. The bottling line area includes a second level mezzanine with bathrooms, offices, and a conference room. The third level mezzanine contains the barrel house. The building has a three stop Class 1, Div.2 elevator.
