## eQuote Training Video Series

At American Buildings, we are continuously evolving our web application, eQuote, to help our Builders easily price more projects. In order for our Builders to gain a firm understanding of eQuote and its many options, we've developed a library of training videos that you can watch at your own pace.

This month we're highlighting the **Drawings** section. The drawings can be useful to communicate preliminary building layouts and components to clients or other trades, as well as verifying the accuracy of your scope inputs. It is encouraged to check these drawings regularly to ensure everything is looking as expected. Watch this video to familiarize yourself with the Drawings section in eQuote.

If you haven't already, please take a moment to watch the introduction video, which outlines the set-up of this exciting video series:

To access our full library of Virtual eQuote Training, please visit the Builder Dashboard and select **eQuote Resources**.
