eQuote Training Video Series

At American Buildings, we are continuously evolving our web application, eQuote, to help our Builders easily price more projects. In order for our Builders to gain a firm understanding of eQuote and its many options, we've developed a library of training videos that you can watch at your own pace.

This month we're highlighting the **SketchUp** models section. These are procedurally generated models that will represent most building components. These models are a great sales tool to customers and to check your input within eQuote. Watch this video to familiarize yourself with the SketchUp models section in eQuote.
