EXCELLENCE IN DESIGN

ABC'S EXCELLENCE IN DESIGN BUILDING OF THE YEAR: Junior Achievement of Northern Indiana

2021

2021 EXCELLENCE IN DESIGN

EACH **AWARD-WINNING PROJECT** HIGHLIGHTS THE **DIVERSE** APPLICATION AND **EXPANDING BOUNDARIES** OF METAL SYSTEMS CONSTRUCTION.

American Buildings Company would like to congratulate the winning entries in the 2021 Excellence in Design competition. Despite a challenging year, we and our Builders persevered to bring these award-winning projects to life, in categories ranging from agriculture to recreation, and office to manufacturing.

The Excellence in Design competition offers a compelling outlet for inspiring new designs that illustrate the many ways metal building systems can meet varying construction needs, regardless of size or complexity. American Buildings Company works with Authorized Builders to transform ideas into reality and expand metal building systems construction.

GOLD

With the ultimate goal of relocating three entities all under one roof, Authorized Builder The Hagerman Group was contracted to build a new campus for Junior Achievement of Northern Indiana. Located in Fort Wayne, Indiana, the 36,000 sf building now houses JANI Headquarters, JA Biz Town, and JA Finance Park — with the purpose of increasing Junior Achievement’s exposure to aid in raising funds and recruiting volunteers. It features a Grand Hall, Entrepreneur Center, and corporate offices. The facility includes two single slope pre-engineered buildings, and three lean-tos added to an existing building. The structure utilizes ABC’s Standing Seam 360 roof panel and ABC’s Architectural III wall system.

SILVER

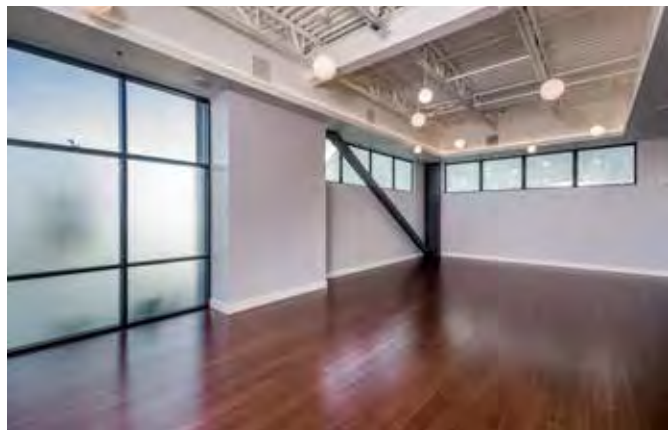

Nugget Markets, Inc., based in Northern California, is a family owned and operated company dedicated to creating an extraordinary grocery experience. Their new corporate headquarters office building incorporates design elements found in several nearby wineries while embracing metal building concepts, successfully blending an agrarian aesthetic with modern features. This 25,000 sf office facility includes an additional 10,000 sf of partial mezzanine space. The structure utilizes ABC's Loc Seam 360 roofing system, and features dormers that contribute to the building's unique and architecturally pleasing roof lines. In addition to skylights, numerous floor to ceiling windows provide for natural light.

BRONZE

Mesa Rim Climbing Centers, with multiple climbing gyms located in California and Nevada, contracted Authorized Builder G&W Builders to build a facility in San Marcos, CA, that features a state-of-the-art, comprehensive climbing experience. The 18,300 sf structure was created in two sections, the Tower Building and Boulder Building. The Tower Building is a 60' tall single slope structure with wall panels that cantilever past the eave, creating a parapet look. The Boulder Building is a 50' tall single slope structure attached to the common wall of the Tower Building. This section includes a full mezzanine with support beams for climbing walls on the first floor and four boulders on the second floor. Buckle restraint bracing and spandrel beams were used in both sections to support climbing walls. ABC provided the insulated metal panels used on the roof.
