

# Ubilla Farms

## LOCATION

Caldwell, ID

## SIZE

68,625 sf

## WALL SYSTEM

R-Panel, Royal Blue

## ROOF SYSTEM

R-Panel, Royal Blue

## BUILDING END-USE

Multi-Use Ag Building

Ubilla Farms consists of two separate structures - leaving plenty of space for a dryer, cooler, and picker for brewing beer. The main building utilizes an asymmetrical design and features a clerestory roof with mesh screening and a conveyor. Exterior stairs lead up to mezzanines that make up 5,797 sf, providing additional room for storage and other supplies. Sixteen, 5'-4" wall lites maximize natural lighting and save significantly on energy costs.
