

# Salava Veterinary Clinic

## LOCATION

Clay Center, KS

## SIZE

5,200 sf

## WALL SYSTEM

R-Panel, Slate Gray

## ROOF SYSTEM

R-Panel, Custom Copper Metallic

## BUILDING END-USE

Veterinary Clinic/Office

The Salava Veterinary Clinic consists of two pre-engineered steel buildings: an office/clinic that attaches to a livestock barn. Clear span interiors offer unobstructed floor space to accommodate livestock and the variety of equipment used at this small and large animal care facility. Five overhead doors along the sides of the barn provide easy accessibility for larger animals. A below-eave canopy marks the front entrance of this clinic, finished in gray wall panels and complimented with stone accents and a custom copper metallic roof.
