BUILDING END-USE

Church

Needing another facility for their growing congregation, American designed a 90' x 135' single slope structure for Grace Christian Fellowship of Mead, Washington. The exterior is clad with American's R-Panel walls in slate gray and a mix of other decorative panels to add dimension and modernize its appeal. American supplied the spandrel beams. Additional features include multiple framed openings for windows and two dark bronze below eave canopies, all adding to the aesthetic of the structure.
