Calumet City, IL

SIZE

20,000 sf

WALL SYSTEM

A-Panel
Pearl Gray/Charcoal

ROOF SYSTEM

Standing Seam 360
Charcoal

BUILDING END-USE

Multi-Purpose Education Facility

This 20,000 sf facility hosts the school town of Munster administration staff, the technology, and maintenance department. Munster Tech Center's unique design is achieved using two gable asymmetrical framing systems and one single slope. Multiple framed openings are incorporated in the design to bear eight overhead doors and lots of windows for natural lighting.

A trio of colors is featured along the exterior, adding dimension and character. The upper wall panels are pearl gray, and the roof, lower wall panels, and trim are charcoal. All canopy panel and trim is brite red. The exterior walls have an 8" curb wall, and masonry accents the a-panel wall system.
