## LOCATION

Lorton, VA

## SIZE

38,000 sf

## WALL SYSTEM

Reverse R-Panel  
Regal White

## ROOF SYSTEM

Standing Seam 360  
Galvalume

## BUILDING END-USE

Church

The Church of Pentecost contains two identically designed sanctuaries to accommodate different language services - each with seating capacities of over 600. The structure utilizes four metal framing systems, providing approximately 38,000 sf for the sanctuary spaces, foyer, chapel, and stair enclosure. Several large classrooms, a fellowship hall, a kitchen, and an office suite furnish the interior areas.

A combination of brick, metal panels, and EIFS polish the surface of the church, along with varying parapet heights. Framed openings were included in the roof design to allow for future installation of prismatic skylights.
