Lititz, PA

SIZE

29,000 sf

WALL SYSTEM

Reverse R-Panel
Custom Black

ROOF SYSTEM

Standing Seam 360
Galvalume

BUILDING END-USE

Training/Rehearsal Studio

The Pod 1A Education Center is a 29,000 sf facility on the Rock Lititz campus, purpose-built for advanced training and education in the live event industry. Added to an existing American structure and separated by a masonry firewall, it includes a large rehearsal studio and multiple tenant spaces.

Three levels of usable space are created through mezzanines, and the structure is engineered to support professional-grade rigging systems with ceiling-mounted grids for heavy hoists and chain loads. Acoustic performance was a key focus, with materials and construction methods selected to minimize sound transmission, noise, and vibration.

The exterior features American's Reverse R-Panel in custom black and a galvalume SS360 standing seam roof. A bold entrance with glass curtain walls, rustic wood accents, and bright yellow trim reflects the creative energy of the campus.
