BUILDING END-USE
Tennis Facility

The Chattanooga Christian School Tennis Facility is a state-of-the-art indoor athletic venue located in Chattanooga, Tennessee, designed to elevate the recreational experience for students and spectators alike. Spanning 30,734 sf, the facility features a gable symmetrical framing system that supports a high-performance envelope composed of Reflective White R-Panels and a Galvalume Standing Seam 360 roof system. These materials not only ensure durability and weather resistance but also contribute to the building's clean, modern aesthetic.

The facility houses multiple indoor tennis courts and includes a mezzanine viewing area that offers elevated sightlines for competitive play. The front entrance showcases a mixed use of paneling and color accents, creating a visually striking focal point that complements the rest of the building's sleek design. The Reflective White R-Panels wrap the remaining exterior, blending functionality with architectural appeal. As a striking enhancement to the CCS campus, this facility not only elevates the school's athletic offerings but also provides a vibrant and functional space for players and spectators to enjoy competitive tennis year-round.
