BUILDING END-USE

Auto Dealership

The FFUN Motor Group's Hyundai Genesis Auto Dealership located in Saskatoon is a landmark development as the first Genesis dealership in Canada. Designed with both functionality and aesthetics in mind, the facility is just over 21,000 sf and is comprised of four single-slope buildings featuring a comprehensive layout that includes office space, a showroom, a service drive-thru, and a service bay.

Defined by parapet walls crowning the structure, the dealership features an R-Boost™ Elevated Roof Insulation System and a Standing Seam 360 roof system in Galvalume. This combination delivers superior thermal performance, strength, and weathertightness – ensuring the building can withstand Saskatchewan's extreme weather conditions while maintaining a sleek, modern look.

The building incorporates twelve overhead doors, Vulcraft open web steel joists, and a second-floor mezzanine serves as an employee lunchroom, enhancing the workspace environment.
