Standing Seam 360
Galvalume & Midnight Black

BUILDING END-USE

Church/Religious Center

Real Life Church, located in Centerville, OH, is designed to serve as a vibrant hub for worship and youth education. The 11,908 sf building is composed of two single slope structures that house the worship center, administrative offices, and classroom spaces. A lean-to structure serves as the entryway and features an at-eave canopy. The entrance and worship center buildings feature glass walls, creating a bright and inviting atmosphere.

The exterior showcases a mix of building materials, including metal panels, a natural stone veneer, and a large storefront section, contributing to a modern and visually dynamic aesthetic. The wall system uses a combination of exterior wall panels in varying colors and profiles, adding visual depth to the facade and perfectly complimenting the Pearl Gray Reverse R-Panels provided by American Buildings. Galvalume Standing Seam 360 roof panels are accented with Midnight Black trim. Inside, the sanctuary is equipped with advanced lighting and integrated technology, elevating the worship experience and reflecting the church's forward-thinking approach to community and faith.
